

The future house of the first team in the capital of Italy.

And "the dream" of Lazio fans have a stadium without their having to share with supporters of another team.

It was "the dream" of President Cragnotti at the first and President Lotito now.

The proposed location of the stadium in recent years have been diverse and not all have found the approval of supporters and institutional bodies.

The fans are convinced that one day someone in the institutional bodies of the city of Rome understands that if London owns 12 stadiums owned by the club ( [www.stadiumguide.com](http://www.stadiumguide.com) ), our city can have at least 1 stadium property ... possibly the S. S. LAZIO.

The poll between supporters for choosing the name of the stadium proposed various alternatives to give a meaningful name to our dream.

The news on the site, collected course on the internet or received by fans, are evidence of our dream!

The preliminary design of the Stadio delle Aquile was carried out by the company AMA Group in 2004 and many of the images on the site were found on the website of the company at ( [www.ama-group.it](http://www.ama-group.it) ).

Thanks to all and I repeat "STRONG LAZIO" always and in any case.

Prince
